Experience and qualifications or training in mentoring	I have been mentored/coached previously but not done so myself before
What interests or excites you about being a mentor?	I think the opportunity to help develop someone who is keen to take the next stage in their career or to improve their skills and experience. Keen to support people who are earlier in their career as I have had a lot of helpful support myself
Areas of expertise that you can support colleagues with as a mentor	I am quite a generalist in comms and engagement and particularly in change programmes such as reorganisations or improvement programmes. I have worked in quite a lot of different organisations – NHS, local government, regulators and ran my own freelance company for a while – so have seen a wide range of organisational cultures and approaches to comms and engagement. I have experience of working at a system level which may be of interest of anyone who fancies giving that a try.
Anything else you would like potential mentees to know	I am very approachable and can offer a supportive ear to talk through career aspirations, dealing with difficult situations or whatever else you would like to explore.
