Vaccinations against serious illness are free

Vaccines are the most effective way to protect you and your family from serious infections – they help you stay healthy.

In England, vaccinations are offered free by the NHS.

If there is no written record of your vaccinations, you will be advised to have the appropriate vaccinations offered in England. It will not harm you if any of these are extra doses of a vaccine you have already had.

Vaccination Saves Lives

Please protect yourself and your family as soon as possible
